

DeJUR AMBASSADOR Automatic Loading 8mm movie projector

- Loading is simplicity itself. All the operator has to do is place a loaded reel on the top spindle and push the leader into the film guide. From there on, everything is automatic; the projector threads the film through guides and gate and on to the take-up reel. The show starts instantly and automatically.
- f/1.5 zoom lens adjusts picture size to fill the screen perfectly—without moving the projector, the image staying in focus while zooming. Lens has a focal length from 15mm to 25mm.
- 400 ft. Film capacity—over thirty minutes of projection.
- New high efficiency, projection lamp for maximum screen illumination. Gives extremely brilliant projected image.
- Built-in film trimmer.

- Swing-out gate for easy cleaning.
- Centralized push-button controls on illuminated instrument panel visible while projecting.
- Portable 8mm film dry splicer mounted in carrying case.
- Automatic switch turns room light off when projector goes on.
- Retractable tilt mechanism on scuff-proof wheels.
- Variable speed control.
- Forward, reverse and still picture control.
- Heavy-duty A.C. motor gives quiet performance.
- Lifetime lubrication.
- Rapid rewind.
- Built into light-weight die-cast aluminum carrying case.
