Beosystem 2500

A completely new look at sound

Fascination is your first impression, when you experience Beosystem 2500. Thoughts like "how is it done?" run through your mind as a move of your hand makes the smoked glass doors slide open – to reveal a glittering arena full of musical adventures. Beosystem 2500 allows for AV integration and remote control operation via your Beolink terminal.

Naturally, you also have the option of connecting a Beogram turntable.

The source selection and programming keys you need to operate Beosystem 2500 are grouped conveniently. And just above them is a lighted display which keeps you informed of what source and to which track on tape or CD you are listening.

Beosystem 2500 has everything you need – and more. It lets you watch your 5" and 3" CDs while

Sources of great pleasure

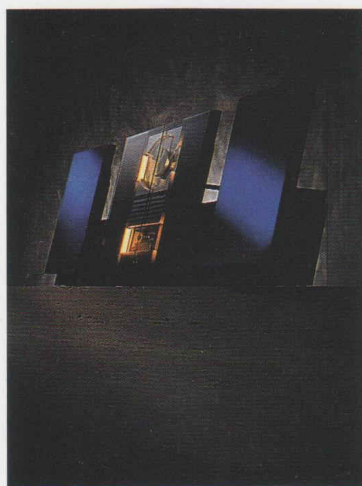

Beosystem 2500 gives you an AM/FM radio, a CD player and a cassette recorder – plus two superb amplified loudspeakers which serve as completely integrated components in the system.

they play. And the cassette recorder features all the benefits and the optimal sound reproduction that characterize Bang & Olufsen.

Innovative thinking coupled with Bang & Olufsen's vast experience in advanced acoustic technology enabled us to create the unique Beolab 2500 speakers with built-in amplifiers, and the capacity to accurately reproduce sound across the entire audible spectrum.

An extra-source of pleasure is the colour scheme, which lets you choose the loudspeaker fabric in cobalt, grey, black, white, cerise or jade.

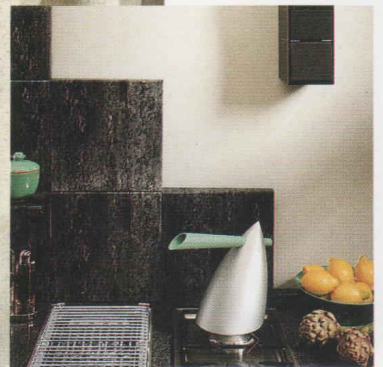

Beosystem 2500 is so fascinating you will want to reach out and touch it again and again and again.

Beolink 1000

Bang & Olufsen

Beolink – a world where only you set the limits

Beolink is the silent electronic language that the Bang & Olufsen products use among themselves.

When you press lightly on one of the three Beolink terminals, your command is passed on to the product that you wish to activate.

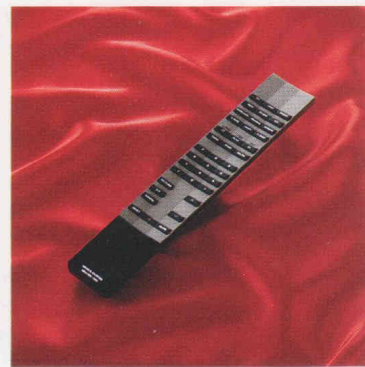

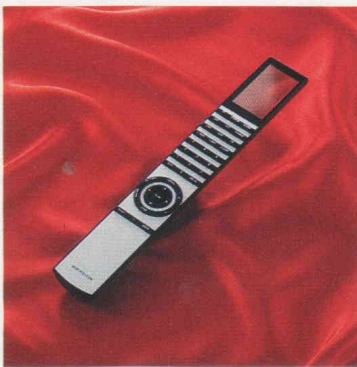

Maybe you want to switch on the music system on the other side of the room. Or you can ask the TV to turn towards you on its motorised swivel base. If you are preparing supper, you can ask to

Beolink 1000

Beolink 1000 is a little like a magic wand. Light touches give you access to all daily functions of your Bang & Olufsen audio and video equipment. It is also ideal as an extra terminal in rooms that are a part of a Beolink system.

Beolink 5000

Beolink 5000's fascinating transparent display simplifies all operation and programming of your Bang & Olufsen audio or video sys-

tem by keeping you constantly informed about what is going on. Its vast resources are accessed with amazing ease.

You can even plan to watch your favourite movie on the bedroom TV – through the video recorder is in your living room.

This system, which lets you use all of your Bang & Olufsen equipment all over your home is called Beolink. And the key to the system is any one of the three Beolink terminals: Beolink 1000, 5000 or 7000.

Your choice of terminal will depend on the extent to which you want to use the many options built into the various Bang & Olufsen sound and picture systems.

tem by keeping you constantly informed about what is going on. Its vast resources are accessed with amazing ease.

Beolink 7000

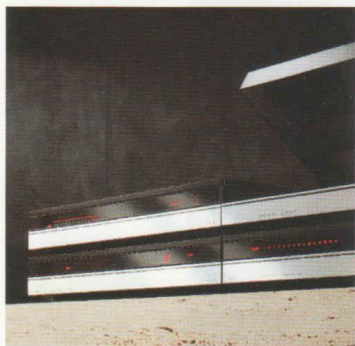

Beolink 7000 is undisputably the most advanced and exciting remote control in the world today. A gentle touch makes the terminal light up and rise towards you to receive your orders. The illuminated display guides you effortlessly through all operating and programming facilities of all Bang & Olufsen sound and picture sources.

Bang & Olufsen

Bang & Olufsen music systems

Beosystem 7000

Via the Beolink 7000 operating panel, the advanced Beosystem 7000 offers you all you could ever wish from a music system. Power and self-confidence emanate from the clean lines, and the sound quality leaves you speechless.

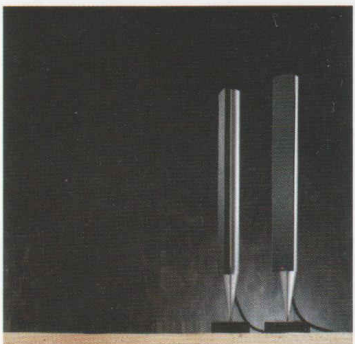

Beosystem 4500

An elegantly simple exterior coupled with an equally simple operation. A light touch on the illuminated display or on your Beolink 5000 terminal gives easy access to all four sound sources in the system.

Beocenter 9500

This distinguished AM/FM receiver has a CD player and cassette recorder waiting under lids that glide to the side. Operation is simple and logical, either by light touches on the lighted display, or on your Beolink 5000 terminal.

Beolab 8000

Beolab 8000 is an active loudspeaker. That is, its two-way bass reflex cabinet system features two amplifiers – one for treble and one for bass. Though relatively small, Beolab 8000 is capable of the most impressive and perfectly balanced sound reproduction.

When you want more than just a receiver, a cassette recorder, a CD player and a turntable, then you are probably looking for a Bang & Olufsen music system. Here distinguished sound quality, elegant presentation and advanced electronic operation are brought together to let you enjoy your favourite music without distraction.

The Beomaster receivers are the brains of Bang & Olufsen's sound systems. The Beomaster communicates your wishes to the other sources and makes sure they are carried out. Finding and fine-tuning radio stations is automatic for up to 20 stations.

The Beocord cassette recorders have Auto Reverse, Dolby noise-reduction and Bang & Olufsen's HX-PRO recording system for optimal sound reproduction.

The Beogram CD players let you listen to both 3 and 5 inch compact discs and house highly advanced digital technology.

The Beogram turntables all have an electronically-controlled tangential arm which plays the record exactly as it was recorded.

Bang & Olufsen

Bang & Olufsen
We think
differently

There is more to life than
the 100,000 hours of
light and sound that we
experience every day. The
difference between a good
and a bad day is often the
quality of the sound that
fills the room.

Beolab Penta

Bang & Olufsen

Bang & Olufsen We think differently

There is so much energy, so much power hidden in Bang & Olufsen's Beosystem 7000 music system, the sculptural Beolab Penta loudspeakers, the exciting 26" Beovision MX 5500 TV and the Beocord VX 5000 video recorder.

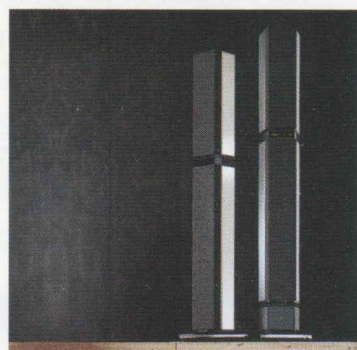

And yet, all this superb technology is controlled with total ease. A gentle contradiction, adding an extra dimension to Bang & Olufsen's philosophy that technology is here for the sake of man and not the other way around.

There is more to Beovision MX 5500 and Beocord VX 5000 than meets the eye. The elegant video system offers lifelike picture quality and a vast number of digital features for more enjoyable viewing.

**Beovision MX 5500
Beocord VX 5000**

Discreet yet readily visible on the column, Beolab Penta's display gives information about sound sources, which track on CD or tape is playing – and at what volume. Without amplifier and display, the loudspeakers are called Beovox Penta.

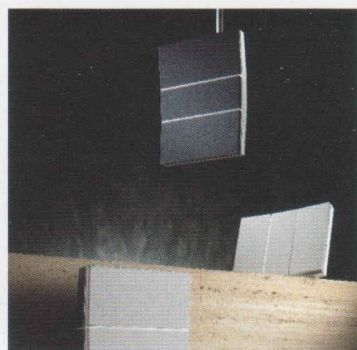

Beolab/Beovox Penta

The "Panel" wall-mounted loudspeakers are available in two versions: the square Beovox and the Beolab with amplifier and display showing which source is playing, at what volume, and which track number on CD or tape you are listening to.

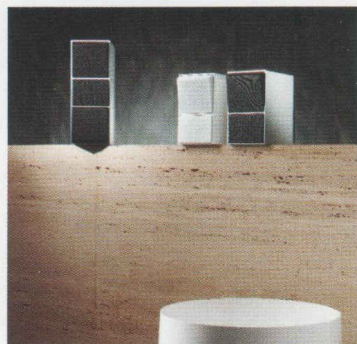

Beolab/Beovox 4500

This advanced design with no parallel lines was created to give you a pure, authentic sound experience without unwanted resonance. Beovox RL comes in four sizes, each providing an individual sound experience.

Beovox RL

In a small room Beovox CX provides fine sound quality with truly good balance. With the help of Beovox Cona bass loudspeaker it can even put on a fine performance in a large room. Ideal as a Beolink connected loudspeaker.

Beovox CX 100/50 Beovox Cona

Bang & Olufsen

Bang & Olufsen moves in new directions

Bang & Olufsen's enthusiasm for fine materials, elegant design and technological development has led us into two new, exciting areas.

Bang & Olufsen's furniture is uncomplicated and built for daily use. Strong construction and choice materials ensure that the units are durable, easy to clean and pleasant to the touch.

F 1000

Bang & Olufsen's F 1000 furniture system is a whole new concept for

housing your stereo and video. A compact and integrated unit, it unfolds into several positions, always with hidden wiring.

Beocom 1000 features a special red button which you can programme to dial any number direct.

It comes with two cubic storage cupboards, and the option of adding an extra cube.

Each has an adjustable aluminium-plated shelf, but you determine the final lay-out, as the cubicles can be fitted with optional trays for storing CDs, music or video cassettes.

Attyca

Attyca features two flexible furniture modules for Bang & Olufsen sound and picture systems, as well as for a selection of those tapes, records and videos you want close at hand.

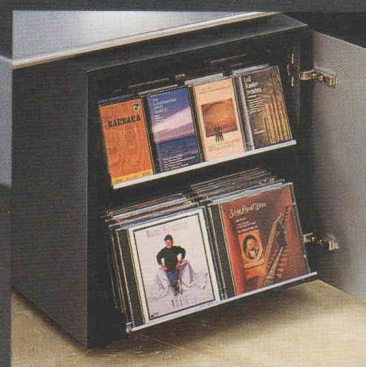

The design is bold, the materials superior and the basic idea both simple yet practical. Hidden wiring adds to the overall impression of elegance.

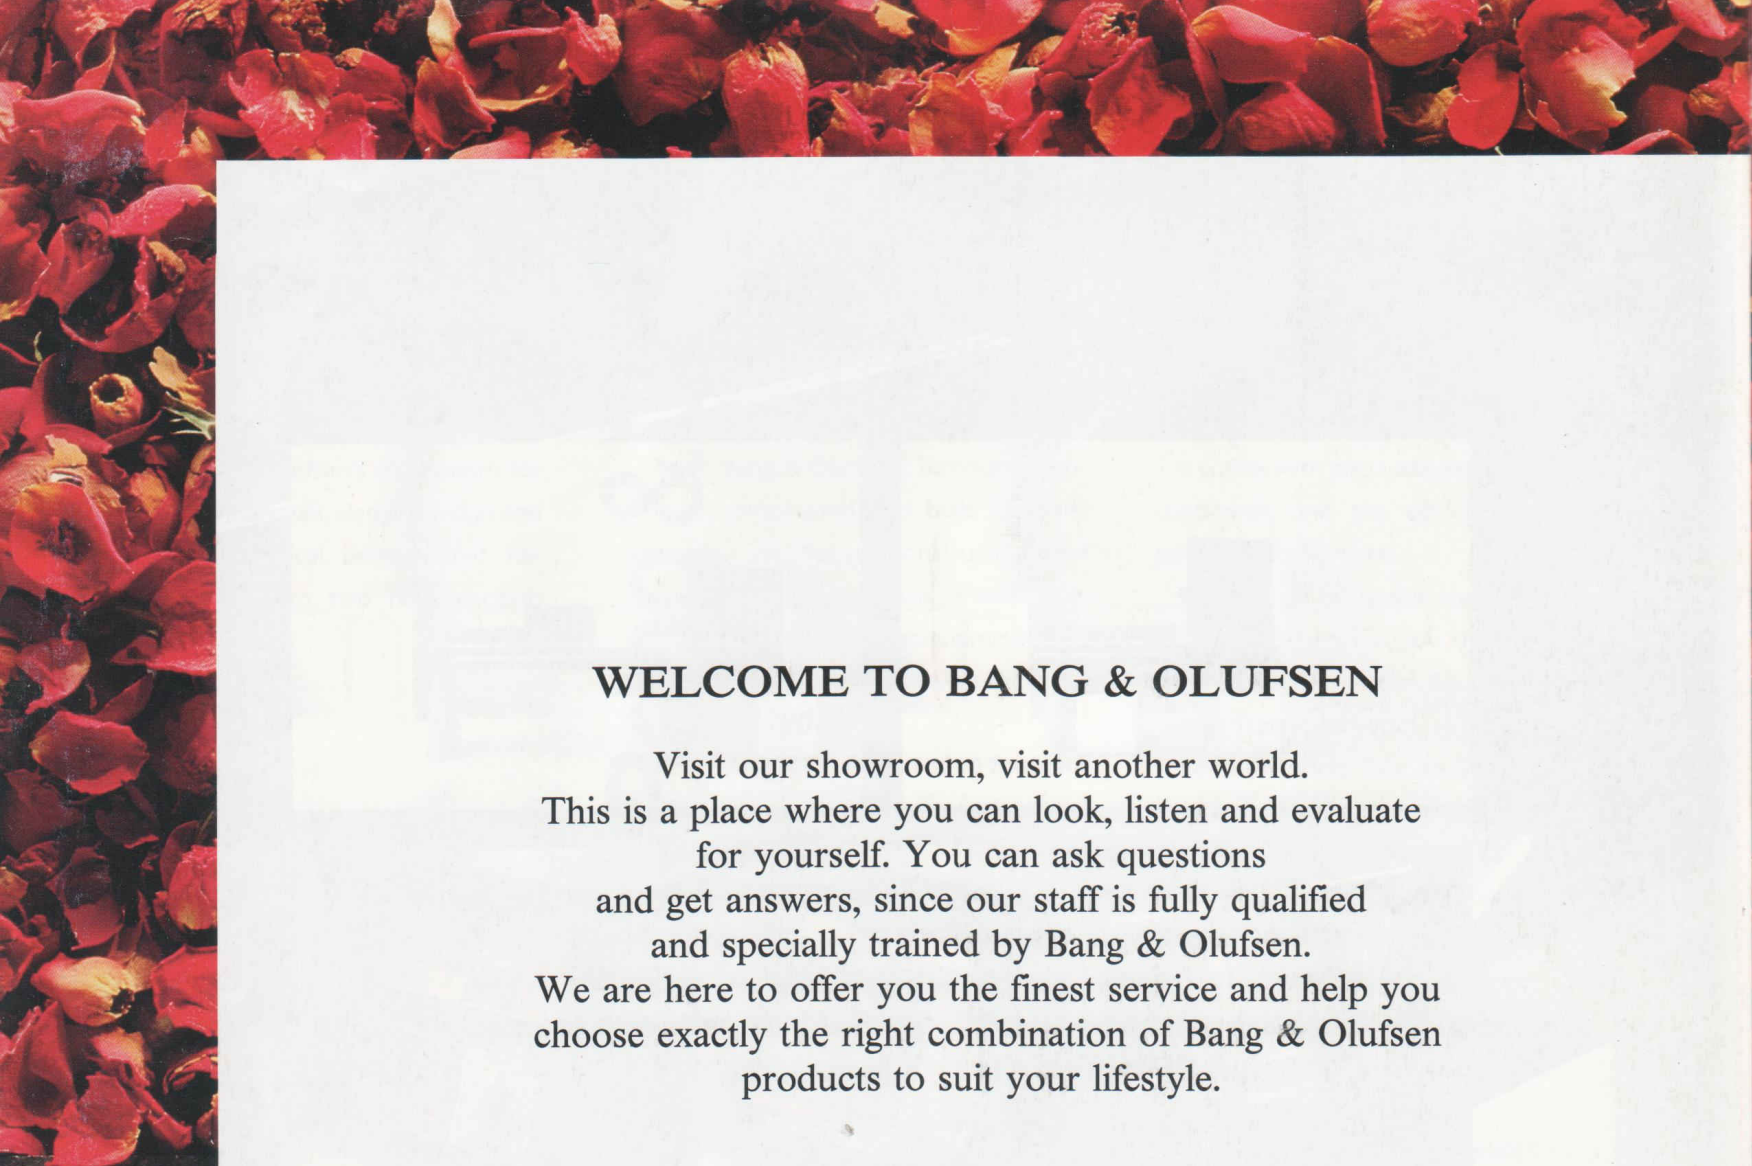

Beocom 1000

Beocom has been created on the basis of the same principles as Bang & Olufsen's advanced music systems. In other words, uncompromising demands on sound reproduction, simple operation and functional design.

Beocom is the first telephone with a built-in pressure chamber loudspeaker. A small technological miracle – not much larger than a match-box.

The Beocom 1000 offers a host of features and is available in many exciting colour combinations.
