Home Cinema Sound from Counterpoint.

At last, a home theater sound system that can satisfy even the most demanding Audiophile! Counterpoint, using the award-winning technology that we're famous for, has put together a system of matchless quality and value. Components are perfectly matched and meticulously crafted in our California facility to leave the guesswork out.

All of the following components are controllable by a single IR remote control (RF available as an add-on option) and when combined together offer a system designed for maximum flexibility as well as simplicity. For example, selecting a VIEWable source, such as Laser disc or TV tuner, will automatically present that source's sound to the speakers. However, selecting any audio source, such as CD or FM tuner, will automatically override the VIEW source. All units are available in Back or Silver, and come with a 3-year limited warranty.

HC-808

Dolby ProLogic® Surround Sound

Processor

Boasting high quality parts such as Roderstein 1% metal film resistors, Wima polypropylene capacitors and Alps motor-driven potentiometers, the HC-808 offers superior, more lifelike sound than competing units. It also features stereo subwoofer outputs, adding impact to footsteps, gunshots and other low frequency sound effects, as well as a bypassable Monitor loop for insertion of an equalizer.

Dimensions:
19" X 2.25" X
10.5" (WHD)

HC-818

Audio Controller

A dual-purpose audio control center, it offers fixed-level outputs for connection to the HC-808. You can select between 7 audio sources by remote. There are two tape loops with full dubbing. The tape outs are controlled independently from the main system outputs permitting "background" recording while listening to another source. And there's more: an audiophile-grade line stage for a separate audio-only high-fidelity sound system!

Dimensions:
19" X 2.25" X
10.5" (WHD)

HC-828

Video Switcher

Slaved off the HC-828, this optional video switcher offers 5 video inputs (S-video or composite) and can be connected to up to three monitors and a VCR with independent source selection for each monitor. All outputs are also S-video and composite. This component features the same solid aluminum machined front panel and buttons, and top quality componentry found in our other Home Cinema product.

Dimensions:
19" X 2.25" X
10.5" (WHD)

Solid 1

Power Amplifier

This amplifier, lauded as the "Best Buy" in Taiwan, and "One of the 10 Best Buys in Audio" by Bound for Sound, is the perfect amplifier for the home theater, or for a dual purpose audio/video system. Based upon FET and bipolar cascode technology, this amplifier offers an impressive 60 amps of peak current, with 100 WPC at 8 Ohms, and 170 at 4. And potentially speaker damaging DC offset is eliminated by a sophisticated servo.

Dimensions:
19" X 4.46" X
10.5" (WHD)

The Audio Company You've Come to Trust.

Our 7-piece Home Cinema speaker system distinguishes itself by utilizing custom-made glass fiber cone technology for superior dynamics and clarity. Additionally, it produces bass in stereo, instead of the mono bass home theater speaker systems frequently sold. The standard finish is black suede Nextel, with other finishes available on a special order basis. All speakers can be purchased together or separately, and come with a 5-year limited warranty.

The BIJOU

Center dialogue Speaker

How often do you find yourself thinking, "What did she just say?" when watching a film? It is the all-important center dialogue channel which makes the difference here. By using drivers of a quality found in the finest audiophile systems, ultimate clarity is achieved.

Specifications

Shielding: <3 Gauss @ 3 cm
Impedance: 4 Ohms
Freq.: 60 Hz-20kHz
Power Handling: 100 Watts
Sensitivity: 87 dB @ 1W/1M
Woofers: Two 5.25" Glass Fiber
Tweeter: One 1" Aluminum Dome
Dimensions: 7" X 17.5" X 8" (HWD)

The ORPHEUM

Right/Left Satellite Speaker

These stereo speakers are good enough to stand alone in a quality home stereo. But what they do in a home theater is simply astonishing. Their ability to localize characters and action will astound you. But maybe you shouldn't be surprised, as they are from Counterpoint.

Specifications

Shielding: <3 Gauss @ 60 cm
Imped.: 8 Ohms
Freq.: 60 Hz-20kHz
Power Handling: 100 Watts
Sensitivity: 87 dB @ 1W/1M
Woofers: Two 6.5" Glass Fiber
Tweeter: One 1" Aluminum
Dimensions: 14" X 9" X 10" (HWD)

The MYSTIC

Dipolar Surround Speaker

The rear surround speakers are what gives your theater system its front to back localization and depth. Counterpoint speakers are simply better designed to enhance the presentation with a sophisticated dipole design that gives the monophonic rear signal increased ambience and depth.

Specifications

Shielding: <3 Gauss @ 60 cm
Imped.: 4 Ohms
Freq.: 60 Hz-20kHz
Power Handling: 100 Watts
Sensitivity: 85dB @ 1W/1M
Woofers: Two 5.25" Glass Fiber
Tweeter: One 1" Aluminum
Dimensions: 10" X 7" X 8" (HWD)

The EMBASSY

Right/Left Subwoofer/Stand

These stereo subwoofers serve not only to provide solid bass to 30 Hz, but also to be attractive speaker stands or endtables. Finished in Piano-black lacquer, these subwoofers have a built-in crossover. The versatile Embassies can enhance performance in any system.

Specifications

Shielding: <3 Gauss @ 60 cm
Imped.: 8 Ohms
Freq.: 30Hz-60Hz
Power Handling: 200 Watts
Sensitivity: 87 dB @ 1W/1M
Drivers: Two 8" Polypropylene Woofers.
Dimensions: 26" X 15" X 17" (HWD)
