

aggregation. The MODEL 90 includes all of the advances pioneered by EPI. Extended Frequency Response is another way of describing the ability of the speaker to reproduce to the very lowest and very highest musical frequencies. Extreme Linearity is the speaker's ability to reproduce any signal fed to it accurately with no exaggeration or deterioration. Excellent Dispersion fills any listening room with equal musical energy over the entire range of the speaker. Minimum Distortion — both harmonic and intermodulation — will eliminate listening fatigue. Pack all this in a cabinet compact enough to fit on any bookshelf and you have an outstanding example of acoustical engineering. You also have an outstanding example of the EPI philosophy . . . continuing research focused on bringing you the ultimate in sound reproduction at realistic prices. By refusing to compromise the integrity of the performance, but still holding to an economical effort, EPI has managed to provide a generation of loudspeakers which deliver a rich sound at a tight price.

PHILOSOPHY OF EPI LOUDSPEAKERS

Our dedication to product quality is based on our personal interest in the integrity of sound. We're after the natural sound, a new clarity which defines the unique acoustical properties of every instrument. It is our desire to continue to pioneer improvements in the area of natural sound, and at the same time, furnish you with a realistically priced component. With this as a focus, EPI as a company has taken steps to insure that our products do what they are designed to do — provide you with the ultimate in listening satisfaction. We have separated our company into three divisions. With this new corporate structure, we can continue to develop new, exciting audio products in different price ranges because each speaker line gets the full design and engineering attention it deserves. EPI LOUDSPEAKERS division has incorporated all our new technological advances, including new cabinet-making technologies, into three existing products. The result is three high-performance speaker systems at value prices.

EPI MODEL 90

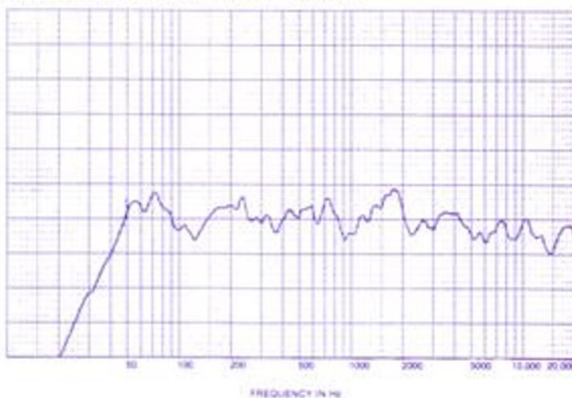

As a direct descendant of the top-rated EPI MODEL 100 (and, in fact, delivering the same level of performance) the EPI MODEL 90 represents another exciting product introduction from the standpoint of acoustical perfection. The 90 produces LINEAR SOUND, which is an unbiased sound. Straight line response from the bass tones right up through the high end with no artificial boosting of the bass and with no omission of nuances and overtones in the high frequencies. Very succinctly stated, this results in clean, pure sound without coloration, distortion, or ex-

SPECIFICATIONS:

Size:	21" x 11" x 9"
Weight:	25 lbs.
Frequency Response:	45 to 18,000 HZ \pm 3 dB
Recommended RMS Power Range:	12 to 50 watts
Crossover Frequency:	1800 HZ
Driver Components:	1 - 1" Air Spring Tweeter 1 - 8" Long Traverse Woofer
Nominal Impedance:	8 Ohms
Warranty:	3 Years
