Skylark

3-Way Loudspeaker System

FOR CONTEMPORARY LIVING

© beim Hersteller

THE SKYLARK. 3-Way Loudspeaker system complete with Model SP8C 8-in. coaxial driver, electrical crossover network, Model T35B VHF driver, and brilliance control—wired and installed in cabinet, ready for operation.

Mahogany Net, \$95.00
Blonde (Lined Oak)..... Net, \$98.00

Frequency Response Range: From 70 cps to beyond audibility. In the low-frequency range, below 100 cps, a slight advance of the amplifier bass control provides perfect musical balance in the first octaves to the excellent treble and high ranges.
Peak Power Input: 25 watts.
Continuous Program Level: 20 watts.
RETMA Sensitivity Rating: 44 db.
Critical Damping Factor: Approximately 5, varying slightly according to placement.
Impedance: Standard at 16 ohms.
Magnet Weight: ¾ lb. Alnico V.
Size: 14½ in. high (11¾ in. high without feet), 10¾ in. deep, 33 in. wide.
Shipping Weight: 32 lb.

BEAUTIFUL, AUTHENTIC FURNITURE STYLING...*Hand-rubbed hard wood veneers in Tropical Mahogany or Korina Blonde.*

COMPLETE 3-WAY HIGH FIDELITY SYSTEM...*Combines 8-in. E-V Radax coaxial bass-and-treble driver with the E-V Super-Sonax very-high-frequency driver.*

SPACE-SAVING DESIGN...*Fits perfectly on table or bookshelf. Gives superlative performance in only three cubic feet of space.*

Enjoy high fidelity you never thought possible in so compact and economical a reproducer. Functionally designed for contemporary living, the space-saving SKYLARK combines authentic furniture styling with superlative 3-way system performance. By dividing the audio spectrum into three sections, the SKYLARK provides smooth, distortion-free reproduction in each range of frequencies, properly balanced for clarity and richness. Brilliance control permits easy matching of system to room acoustics. Graceful feet are detachable to conserve space and facilitate use anywhere in the room.

This illustration shows how the interior construction of the Skylark achieves superlative bass response through employment of two tapered low-frequency reflex ports. Length of the path is increased and purity of bass enhanced through this novel design.

DRIVER COMPONENTS—The SKYLARK is available only as a complete assembly and employs a specialized Model SP8C 8-in. Radax Coaxial Bass-and-Treble Driver. A special ¼-Section Electrical Crossover Network feeds the T35B Super-Sonax VHF Driver from 3500 cps to beyond audibility.
