HiFi-Classic.de

You've heard a lot recently about the new breed of super speakers... well, here's Empire's top of the line entry. The all new Grenadier 9500MII. This is no ordinary speaker and the sound it produces is an extraordinary listening experience. This 6 driver, 3 way system uses two down facing 12 inch woofers (acoustically equivalent to an 18 inch low frequency driver)... horn loaded for the kind of bass you can feel as well as hear. The frequency response (less than a 3dB variation from the 1,000Hz reference at 30 and 18,000Hz) is laboratory flat, while transient and harmonic distortion is so low (less than 0.1% at 1 watt, at 1,000 Hz) that it sets a standard even for this new breed of "Super Speakers".

It's what's new inside that counts. We use two wide angle lenses in the Grenadier 9500MII (160 degree radiation) each with their individual ultrasonic domed tweeter and direct radiator mid-range to provide you with CRYSTAL CLEAR STEREO SEPARATION.

The sound is fully coordinated with Empire's exclusive Sound Beacon\*.

\*Empire's trademark for miniature laser beams that pulse and throb in rhythm with the music.

### Power Handling Capacity

A pair of Grenadier 9500MII speakers will thunder through house or auditorium with a phenomenal 500 watts of undistorted music or pulse power.

#### 9500 MII RMS Power Ratings

20-450Hz	200 watts RMS
450-5,000Hz	100 watts RMS
5,000-20,000Hz	40 watts RMS

All new built-in automatically resetting circuit breakers prevent speaker overload and burnout no matter how hard you drive.

### Unbelievably Low Priced

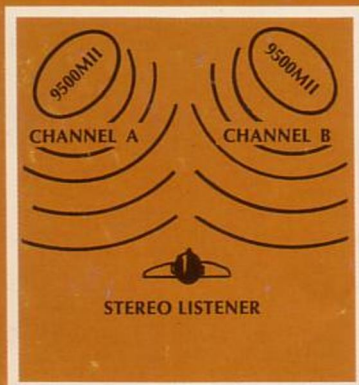

Empire's Grenadier 9500MII (Satin Walnut Top) is list priced at only \$319.95. The imported marble top \$29.95 additional. Other Empire Grenadier Speakers from \$109.95.

Dimensions Grenadier 9500MII:

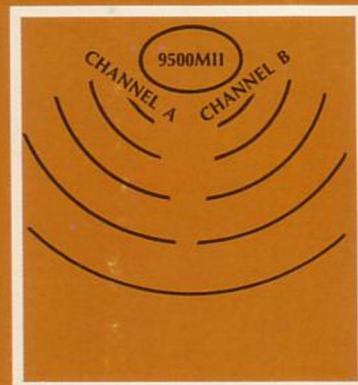

Width 30 in.  
Depth 20 3/4 in.  
Height 28 in.

### How about this for an idea!

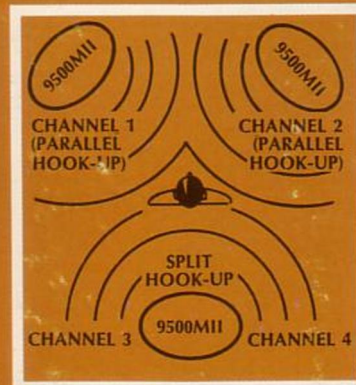

Quick change terminals underneath offer versatility of application. Simple to use as one single speaker in a parallel hook-up or as two separate speakers in a split hook-up.

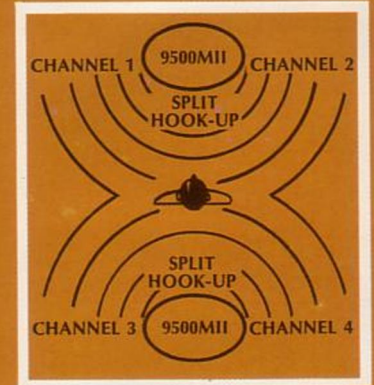

Use a parallel pair for super power stereo.

Use one speaker in split hook-up for stereo in cramped quarters.

How to use three speakers for 4 channel sound.

In cramped quarters use only two speakers for 4 channel sound.
