We want you to hear more music.

MORE QUALITY • MORE FEATURES • MORE PERFORMANCE • MORE VALUE
... than any stereo receiver in its price class

INTRODUCTION

The new Harman-Kardon One Thirty stereo receiver is unquestionably today's best value in high fidelity. It offers more features and better performance than any receiver in its price class. Utilizing the latest refinements in solid state technology, the One Thirty delivers adequate undistorted power to make any of today's efficient speakers come alive with clean, transparent sound. And its super-sensitive AM/FM stereo tuner receives distant stations with unprecedented clarity.

Unlike most stereo receivers, the One Thirty comes complete with a quality oiled walnut wood enclosure. It is ready to play the moment you connect it to your speakers.

Measuring only 11³/₄" deep, the Model One Thirty fits easily on any standard bookshelf without jutting out. Its handsome front panel is sloped to facilitate operation of the controls regardless of where the receiver is installed.

When you see and listen to this new stereo product, it will quickly convince you that a quality stereo receiver doesn't have to be expensive to be superb.

FEATURES

- Unlike most stereo receivers, the One Thirty fits perfectly on a standard 12" deep bookshelf without overhang.
- Powerful, solid state amplifier can fill even a huge room with full, natural sound.
- Receiver includes AM, FM, stereo FM and provision for tape recorder and phonograph with magnetic pickup.
- Separate bass and treble tone controls adjust sound to suit your personal taste. Complete tonal balance over room acoustics or improperly recorded program material.
- Full complement of operating controls: stereo balance, volume, separate rocker on/off, stereo FM indicator light, function switch and station tuning.
- Special electronic circuit switches FM tuner to stereo automatically when stereo FM broadcast is received and back to standard FM when stereo program ends.
- Front panel light indicates when stereo FM broadcast is being received.
- Receiver produces virtually no heat even after many hours of extensive use. This guarantees total reliability and long-lasting performance without deterioration of specifications. No special installation precautions required.
- Enclosure constructed of high quality walnut veneer in hand-rubbed oil finish.
- Electronics guaranteed for two years, parts and labor.
