SPEAKER SYSTEM KITS • SPEAKERS

CABINET KITS

The speaker and cabinet kits described in this informative chart combine the specialized skills and production facilities of Jensen Manufacturing Company, specialists in acoustical research and leading producer of fine High Fidelity loudspeakers and Cabinart, the pioneer manufacturer of High Fidelity furniture and cabinet kits.

With Jensen speaker system kits and Cabinart cabinet kits, you can now assemble your own fine High Fidelity loudspeaker system with unexcelled performance, a maximum of convenience and a minimum of cost.

Jensen Authentic High Fidelity Loudspeaker Kits and Loudspeakers give you a wide choice of systems to suit your needs and preferences, each with a maximum of High Fidelity performance for its type and design.

You can have the fun and satisfaction of building your own Jensen Speaker System with size and performance ranging all the way up from the diminutive, economical Duetto up to the big incomparable 3-way Imperial at savings which will stretch your hi-fi equipment budget.

Jensen speaker units are matched components carefully pretested, with the smooth, balanced, wide range performance for which Jensen factory-made reproducers are famous. Jensen speakers units are complete — every Jensen Authentic High Fidelity loudspeaker kit comes packed in a single carton with all the matched components, frequency division units, controls, wiring, mounting brackets and easy to follow circuit diagrams and wiring instructions for easy installation in your Cabinart Basic Cabinet. No previous experience or technical skill is required.

You can build your speaker system with confidence that your final system will give the excellent reproduction that you would expect from JENSEN'S more than a quarter century of specialization in fine loudspeakers.

Cabinart Cabinet Kits are authentic authorized designs by Jensen to assure you of exact acoustical coordination with the loudspeaker for best performance, a choice of styles and finishes, with precision pre-cut and pre-finished parts for the ultimate in easy assembly.

Cabinart offers for each type and style of enclosure, (a) the Basic Cabinet Kit which forms the functional acoustic enclosure and (b) Prefinished Dress Kits which, when applied over the assembled Basic Cabinet Kit, result in attractively-styled fully-finished furniture suitable for the living room.

Cabinart Basic Cabinet Kits, when assembled, are ready to use as is, wherever appearance is not a factor. It may be painted if you choose or your own custom exterior of fine wood and fabric may be added to match existing decor. The Basic Cabinet also serves well as a convenient "build-in" for a music wall or other integration of hi-fi into the home. Cabinart Prefinished Dress Kits are, of course, the ideal, inexpensive method of "dressing up" the Basic Cabinet. Whatever your choice of Cabinart Kits, you are assured they will fit together easily and perfectly, and give precisely the top acoustic performance intended by Jensen Engineers.

HI-FI SPECIALISTS: We suggest you post this handy chart in your display and demonstration room.
