

LS-5

This 3-way stereo speaker offers the features and the sounds for your own personalized enjoyment. It starts with a large 12" low-frequency driver and matching cabinet for outstanding bass response.

A 1½" Mylar® dome high-frequency driver gives the LS-5 an extra-wide 170° dispersion of the high range. It's carefully designed to send out sound waves in the hemispherical shape of its dome, so the crisp accurate highs reach almost every point in the room.

The LS-5 also boasts two mid-frequency drivers. This gives you a greater-than-ever fullness of sound. These two

drivers also facilitate greater power handling to match that of the 12" low-frequency driver with which they are paired.

You'll also find two controls behind the LS-5's grille. One for the high-frequency driver. And another for the mid-frequency driver. Which means extra flexibility and extra sound customizing capabilities in this Lifestyle Speaker System.

And of course, the LS-5 displays the attractive styling of cabinet and grille which complements any decor.

Specifications

Minimum power: 10 watts continuous RMS

Maximum power: 75 watts continuous RMS

Peak power: 150 watts

Useable frequency response: 25 Hz-25 kHz

Qualified frequency response: 50 Hz-20 kHz ± 3 dB

Low frequency driver: 12" with polyurethane foam cone suspension

High frequency driver: 1½" Mylar® dome

Mid frequency drivers: Two 3" with Tuned Isolation Chambers™

Impedance: 8 ohms nominal

Dispersion: 170°

Controls: front mounted, continuously variable, calibrated in dB attenuation from maximum (0 dB) level

Connections: Kwik-On™ push-type color coded terminals. Angle mounted for easy access

Cabinet: Wood grained vinyl on wood composition panels. Wipes clean with damp cloth.

Dimensions: 26" x 15½" x 13½"

Net Weight: 50 lbs
