

# LS-6

The 3-way Lifestyle Speaker System for truly superior home stereo sound reproduction.

A massive 15" low frequency driver reproduces every low tone with the fullness and rich quality it deserves. The large, carefully designed cabinet adds to the richness of the bass.

The LS-6's extremely high power handling capability is a credit to the care that went into the design and production of its high-temperature voice coils, cross-over and other components. Its maximum power rating of 90 watts lets you team it with practically any of the new high output amps on the market. Yet the efficiency of

the LS-6 lets it be driven by as little as 10 watts minimum continuous power.

To personalize the speaker to your slightest preferences, simply adjust its two 3½" mid-frequency drivers with one control, and adjust the 1½" dome high-frequency driver with the other.

As for quality control, at Jensen it's almost a passion. We test every major component for the Lifestyle Speaker System as it is produced and again before the speaker is assembled. Then, as a final quality test before packing, each and every Lifestyle speaker is tested in a special booth built right into the production line.

## Specifications

**Minimum power:** 10 watts continuous RMS

**Maximum power:** 90 watts continuous RMS

**Peak power:** 180 watts

**Useable frequency response:** 20 Hz - 25 kHz

**Qualified frequency response:** 45 Hz - 20 kHz ± 3 dB

**Low frequency driver:** 15" with polyurethane foam cone suspension

**High frequency driver:** 1" Mylar™ dome

**Mid frequency drivers:** Two 3½" with Tuned Isolation Chambers™

**Impedance:** 8 ohms nominal

**Dispersion:** 170°

**Controls:** Front mounted, continuously variable, calibrated in dB attenuation from maximum (0 dB) level

**Connections:** Kwik-On™ push type color coded terminals

Angle mounted for easy access

**Cabinet:** Genuine hardwood walnut and walnut veneers

**Dimensions:** 30½" (incl. base) x 18½" x 16½"

**Net Weight:** 70 lbs.
