MX-110 Stereo Tuner Preamplifier

Two new panel locking buttons at lower corners of front panel make installation adjustments a snap! Unit slides like a drawer, locks "in" or "out" instantly. All phono and auxiliary channels may then be easily matched to tuner loudness by controls behind front panel. Has interstation noise suppression, tuning indicator, stereo light, separate bass/treble controls, phase switch, 6-source input selector, new "mode" selector allowing ideal operation for every possible input. Preamplifier has extremely low distortion; extremely high sensitivity. 15"x5 1/4"x13".

31T002E, Ship. wt. 30 lbs. \$25 Mo., Net 399.00

30T387E, 110WO Oiled Walnut Case, Wt. 8 lbs. Net 25.00

MR-67 Stereo Tuner

A precision engineered, highly sensitive FM multiplex tuner. Along with the McIntosh designed PANLOC system the MR-67 features the revolutionary new Multipath Indicator permitting perfect antenna rotation to eliminate "multipath" signals bounced from nearby building, hill, etc. Has new delayed action AFC circuitry. 15"x5 1/4"x12-3/16".

31T005E, Ship. wt. 32 lbs. \$25 Mo., Net 299.00

30T387E, 110WO Oiled Walnut Case, Wt. 8 lbs. Net 25.00

C-11 Stereo Preamplifier

Combines excellence in performance with ease of operation. New rocker-type switching controls. New direct phase control switch. New variable tape playback equalization controls. Eight input channels. Separate bass and treble controls for each channel. Less than 0.2% distortion, 20-20,000 cycles at 10 volts output. Typical waveform analysis shows only 0.05% distortion for 3 volts output! Input noise level 1.5µV. on phono channels. 14 1/2"x4 1/2"x12".

30T352E, Ship. wt. 26 lbs. \$15 Mo., Net 229.50

30T387E, 110WO Oiled Walnut Case, Wt. 8 lbs. Net 25.00

50 Watt Stereo Amplifier

Newest McIntosh stereo power amplifier, the MC-225. Has two powerful 25 watt amplifiers on one chassis. Meets high McIntosh standards; harmonic distortion less than 0.5% at rated output; noise and hum 90 db or more below rated output; intermodulation distortion less than 0.5% for any combination of frequencies from 20 through 20,000 cycles; phase shift less than $\pm 15^\circ$. Output impedance 4, 8, 16, 150, and 200 ohms. 14 1/2"x9 1/2"x7". Chrome and black.

30T343E, Ship. wt. 39 lbs. \$15 Mo., Net 198.00

80 Watt Stereo Amplifier

The MC-240 has two 40-watt amplifiers on one chassis. The phase shift is less than $\pm 8^\circ$. As in the MC-225, input impedance is 250,000 ohms and input sensitivity is 0.5 to 30 volts. The reserve built into every "Mac" frees you from making critical adjustments. McIntosh has NO bias controls. NO balance controls! McIntosh cures the need for them! The exclusive patented McIntosh Unity Coupled Circuit cannot be used by any other manufacturer. Frequency range at rated output: ± 0.5 db 16-60,000 cycles. Harmonic distortion in mid frequencies is typically under 0.1%. 17 1/2"x10 1/2"x8".

30T348E, Ship. wt. 59 lbs. \$25 Mo., Net 288.00

150 Watt Stereo Amplifier

Where the MC-225 has two 25-watt amplifiers, and the MC-240 has two 40-watt amplifiers, the MC-275 has two massive 75-watt amplifiers on one chassis, giving you an even greater reserve of power — 75 watts on each stereo channel or 150 watts monophonic. Phase shift between 20 through 20,000 cycles is less than $\pm 8^\circ$. Stereo output impedances of 4, 8, 16 ohms; mono 2, 4, 8, 16, 32 ohms (plus others). 17 1/2"x12 1/2"x8".

30T342E, Ship. wt. 75 lbs. \$40 Mo., Net 444.00

Monaural Amplifiers

The McIntosh MC-40 is a 40-watt power amplifier for use in monaural systems or as one channel in stereo systems. Excellent for home use or commercial uses in recording studios or PA systems. Same fine "specs" as in the stereo units above for rated 40-watt output! Same free 3-year service contract! The MC-75 has same features at 75 watts. And the McIntosh claim: "Of all the good amplifiers . . . no other . . . sounds as pleasing . . ." 13 1/2"x8 1/2"x7 1/2".

30T353E, MC-40, Sh. wt. 35 lbs. \$15 Mo., Net 159.00

30T351E, MC-75, Sh. wt. 48 lbs. \$15 Mo., Net 229.50
