

TONABNEHMER

WIDE-RANGE DUAL-MAGNET CARTRIDGE

This amazing cartridge employs the smallest moving magnets possible to manufacture. Because it has a magnet-coil assembly for each channel, irregularities are eliminated and a flat response is achieved over a very wide frequency range (10 Hz to 20 kHz) to assure a brilliant and accurate high fidelity reproduction of all disc records.

TECHNISCHE DATEN

TYPE Dual Magnetype

FREQUENCY RESPONSE 10 to 20.000 Hz

OUTPUT VOLTAGE 3.3 mV per channel (1.000 Hz, 50 mm/sec)

OPTIMUM LOAD 47 kohms

TRACKING FORCE 2 g

STYLUS 0.5 mil .diamond spherical (SN-43)
