

Super Bass Speaker System SB-G800

4-way bass reflex speaker system. 41cm (16 $\frac{1}{8}$ "") Super Bass Woofer delivers double the bass power compared with conventional woofers of equivalent size. 16cm (6 $\frac{5}{16}$ "") midrange driver operates in its own hermetically sealed cavity, preventing mutual interference between midrange and woofer. 6.5cm (2 $\frac{1}{2}$ "") tweeter is equipped with diffuser (acoustic lens) to assure wide dispersion of treble sound. Dome-type super tweeter (14mm diameter) provides extra high range clarity, and is also equipped with acoustic equalizer and diffuser plate. High range response can be fine-adjusted with tweeter level control. Tuned, vented design contributes to high sensitivity: 98dB/watts sound pressure level at 1 meter. Frequency response: 35Hz ~ 25kHz. Power handling capacity: 250 watts music. Resettable thermal relays with overload indicator. 8 ohm impedance. Crossover frequencies: 250Hz, 2.5kHz, 10kHz. Walnut grain cabinet.
